

Dog Training Basic Obedience

Lesson Plan

Zak George's Dog Training Revolution - A revolutionary way to raise and train your dog, with “a wealth of practical tips, tricks, and fun games that will enrich the lives of many dogs and their human companions” (Dr. Ian Dunbar, veterinarian and animal behaviorist). Zak George is a new type of dog trainer. A dynamic YouTube star and Animal Planet personality with a fresh approach, Zak helps you tailor dog training to your pet’s unique traits and energy level—leading to quicker results and a much happier pup. For the first time, Zak has distilled the information from his hundreds of videos and experience with thousands of dogs into this comprehensive dog and puppy training guide that includes:

- Choosing the right pup for you
- Housetraining and basic training
- Handling biting, leash pulling, jumping up, barking, aggression, chewing, and other behavioral issues
- Health care essentials like finding a vet and selecting the right food
- Cool tricks, traveling tips, and activities to enjoy with your dog
- Topics with corresponding videos on Zak’s YouTube channel so you can see his advice in action

Packed with everything you need to know to raise and care for your dog, this book will help you communicate and bond with one another in a way that makes training easier, more rewarding, and—most of all—fun!

The Other End of the Leash - Learn to communicate with your dog—using their language “Good reading for dog lovers and an immensely useful manual for dog owners.”—The Washington Post An Applied Animal Behaviorist and dog trainer with more than twenty years’ experience, Dr. Patricia McConnell reveals a revolutionary new perspective on our relationship with dogs—sharing insights on how “man’s best friend” might interpret our behavior, as well as essential advice on how to interact with our four-legged friends in ways that bring out the best in them. After all, humans and dogs are two entirely different species, each shaped by its individual evolutionary heritage. Quite simply, humans are primates and dogs are canids (as are wolves, coyotes, and foxes). Since we each speak a different native tongue, a lot gets lost in the translation. This marvelous guide demonstrates how even the slightest changes in our voices and in the ways we stand can help dogs understand what we want. Inside you will discover:

- How you can get your dog to come when called by acting less like a primate and more like a dog
- Why the advice to “get dominance” over your dog can cause problems
- Why “rough and tumble primate play” can lead to trouble—and how to play with your dog in ways that are fun and keep him out of mischief
- How dogs and humans share personality types—and why most dogs want to live with benevolent leaders rather than “alpha wanna-bes!”

Fascinating, insightful, and compelling, *The Other End of the Leash* is a book that strives to help you connect with your dog in a completely new way—so as to enrich that most rewarding of relationships.

The Art of Training Your Dog: How to Gently Teach Good Behavior Using an E-Collar - Fully train your dog in just six weeks with this revolutionary new method. The Monks of New Skete, long-time breeders of German shepherds and renowned trainers of all breeds and mixes, have codeveloped a successful new training technique. They and Marc Goldberg, who pioneered the approach, offer you and your canine companion a way forward using a game-changing tool: the invisible leash or electronic collar. Now in paperback, *The Art of Training Your Dog* presents their compassionate, efficient system along with helpful advice on choosing the best collar. At the right moment, using a light touch—that many humans can't even feel—strategically refocuses your dog's attention. This method helps you create effortless teaching moments that tie into your dog's pack instincts and help strengthen your bond with your dog. In as little as six weeks, your pup can master good leash manners; obey basic commands, such as sit, down, and stay; stop problematic behaviors; and play safely off leash with consistent recall.

Basic Dog Training Tips For Beginners - If you're getting a puppy for the first time, you need to make sure every member of the family is ready. The techniques you will learn in this book will help you with the fundamentals of obedience in your puppy. Inside you will find how to teach your puppy to recognize their name, come to you when you call their name, sit down, lay down, stay, and leave potentially dangerous items at your command. These 6 training sessions will prepare your puppy for polite and proper interaction with their surrounds, safeguard your puppy from harm, and give you ease of mind. All stress free.

Do as I Do - Train dogs based on "social learning"? Yes! Recent research suggests that dogs can engage in social learning which includes the ability to observe the actions of other dogs and imitate them to learn new behaviors. The big news for dog trainers is that author Claudia Fugazza and her colleagues in Europe have discovered that dogs can also imitate people. This natural skill can be used to teach dogs new behaviors using the Do As I Do protocol presented in this book-DVD combination. The "Do As I Do" method is particularly useful in working with service dogs and canine athletes who must master skills such as ringing a bell, jumping over a hurdle, spinning and dozens more. Learn about: The fascinating research which shows that dogs can observe, then imitate human behavior and remember it over time. How you can start with a known behavior, then teach the dog to perform the behavior after observing you demonstrate it, followed by the new cue "Do it!" Eventually the dog learns that "Do it!" means to do whatever has just been demonstrated by the trainer, even new behaviors. How this method can build a closer bond between you and your dog, bring new energy and joy to your training efforts and challenge your thinking about how dogs learn. Book jacket.

Positive Training for Show Dogs - Train your dog to love showing! Most people learn how to train their show dog by trial and error with emphasis on error. Much of the information about show dog training is learned by ringside observation or word-of-mouth from experienced exhibitor to novice.

A New Approach to Dogs and Dog Training - This book presents a new and innovative concept in dealing with dogs: the human-canine synergy (HCS), characterized by a holistic nature and its differentiation from unidimensional terms expressing the affiliation of humans and dogs (Relationship, Interaction, Bonding). Related to the use and training by humans, it applies three main categories of dogs: a) the empathy/therapeutic individuals, which are dogs helping persons with empathy- or therapeutic needs; b) assisting/working dogs carrying out specific actions to aid or assist humans perform specific tasks; and c) the facilitating/inspiring dogs, which enable or improve various human activities, including classroom dogs for teaching and learning purposes in almost all educational

subjects. Organized in three parts, chapters address the following needs: • The first section illuminates the concept of HCS as well as basic principles determining this synergy and consequently the process of training dogs (owners and professional trainers). Readers will understand the role of a dog's personality, behavior and especially temperament in its successful training. • In a scientifically documented way, the second part guides those who wish to engage in dog training (amateur or professional). It describes basic training forms within the HCS framework (obedience, protection, detection and classroom dog) and necessary steps for proper completion. • The third book part describes the business of dog training with multi-dimensional approach by emphasizing a good understanding and knowledge of interactions and the environment in which trainer, owner and dog typically operate. Overall, this work is a valuable read for anyone who deals with our four-legged companions for business or pleasure.

Helpful tables and references add to the value of this process safety resource.

The Pawsitive Power of Planning: A Look at **Basic Obedience Lesson** Plans for Dogs

We all love our furry companions, but sometimes that boundless energy and enthusiasm can feel less like a blessing and more like a...challenge. Enter the world of **dog training**. While the thought of transforming your bouncy bundle of fur into a perfectly behaved canine might seem daunting, the reality is far more rewarding, and it all begins with a well-structured **lesson plan**. This week, we'll delve into the essentials of a **basic obedience lesson plan**, exploring what makes it effective and how it can transform your relationship with your **dog**. Forget the image of stern instructors and shocked collars; we're focusing on positive reinforcement, building trust, and creating a happy, well-adjusted pup.

A successful **basic obedience lesson plan** isn't about rigid rules and rote memorization; it's about building a communicative relationship with your **dog** based on understanding and mutual respect. A typical **plan** should include:

Clear Goals: Define what you want to achieve in each session. Don't try to teach everything at once! Start with simple commands like "sit," "stay," "come," and "down."

Positive Reinforcement: This is the cornerstone of effective **training**. Reward desired behaviors immediately with treats, praise, or toys. Avoid punishment, as it can damage your bond and create fear-based **obedience**.

Short, Frequent Sessions: Dogs have shorter attention spans than humans. Keep **training** sessions brief (10-15 minutes) and frequent (several times a day).

Consistency: Everyone in the household should use the same commands and **training** methods. Inconsistency confuses the **dog** and hinders progress.

Appropriate Environment: Choose a quiet, distraction-free area for **training**. As your **dog** progresses, gradually introduce more distractions.

Individualized Approach: Every **dog** learns at a different pace. Be patient and adapt your approach to your **dog's** learning style and personality.

Let's outline a sample **lesson plan** for teaching the "sit" command. This illustrates the step-by-step approach crucial for success:

Day	Goal	Method	Duration	Reinforcement	Notes
1	Lure the dog into a sit position	Hold a treat close to the dog's nose and slowly move it over its head and back.	5 minutes	Treat and verbal praise ("Good sit!")	Focus on getting the dog to understand the association between the movement and the reward.
2	Introduce the verbal cue	Repeat Day 1, but say "Sit" just as the dog's rear touches the ground.	5 minutes	Treat and verbal praise	Start with the hand signal and then add the verbal cue.
3	Practice with distractions	Repeat Day 2, but add slight distractions (e.g., a toy nearby).	10 minutes	Treat and verbal praise	Gradually increase the level of distraction.
4	Test without lure	Give the "Sit" command without using a treat to lure.	5 minutes	Treat and verbal praise only if successful	If unsuccessful, go back to the lure method.
5	Practice with varying locations	Practice the "Sit" command in different locations in the house.	10 minutes	Treat and verbal praise	The goal is to generalize the command to different environments.

Once your **dog** has mastered **basic** commands, you can move on to more advanced skills. These could include:

Stay: Teaching your **dog** to remain in a specific position (sit or down) for increasing durations. This requires patience and consistent reinforcement.

Come: This is crucial for safety. It involves rewarding your **dog** immediately when it comes to you when called.

Leave It: Teaching your **dog** to ignore tempting objects, preventing them from eating things they shouldn't.

Drop It: **Training** your **dog** to release an object on command.

Heel: Teaching your **dog** to walk calmly by your side.

Training is rarely a seamless process. Expect setbacks and be prepared to troubleshoot.

Lack of Motivation: Experiment with different rewards (treats, toys, praise) to find what motivates your **dog** most.

Distractions: Start **training** in quiet environments and gradually introduce distractions.

Inconsistency: Ensure everyone in the household is using the same commands and **training** methods.

Frustration: Take breaks if you or your **dog** become frustrated. Positive reinforcement relies on a happy, relaxed environment.

A well-structured **basic obedience lesson plan** offers immense benefits, extending far beyond simply achieving perfectly executed commands:

Improved Communication: **Training** builds a stronger bond between you and your **dog** through clear communication and mutual understanding.

Enhanced Safety: Commands like "come" and "leave it" are crucial for your **dog's** safety and well-being.

Reduced Behavioral Problems: **Obedience training** can help address and prevent many behavioral issues such as excessive barking, jumping, or chewing.

Increased Confidence: Both you and your **dog** will gain confidence through successful **training**.

More Enjoyable Relationship: A well-trained **dog** is a happier **dog**, leading to a more fulfilling and enjoyable companionship.

In conclusion, the investment in a well-structured **basic obedience lesson plan** pays dividends in a stronger bond, a safer environment, and a more harmonious relationship with your canine companion. Remember, patience, consistency, and positive reinforcement are key. It's not about perfection; it's about progress, and every step forward is a victory for both of you.

Advanced FAQs:

1. My **dog** ignores me during **training**. What should I do? Ensure your **dog** is sufficiently motivated

by using high-value treats or toys. Break down the task into smaller steps, and make sure your **training** sessions are short and rewarding.

2. How can I deal with a **dog** who gets easily distracted during **training**? Start **training** in a quiet, distraction-free environment and gradually introduce distractions. Use high-value rewards to keep your **dog** focused.

3. What if my **dog** understands the commands but refuses to obey? This might indicate underlying anxiety, fear, or a lack of confidence. Consider consulting a professional **dog** trainer to address the issue.

4. My **dog** is older; is it too late to start **obedience training**? It's never too late! Older dogs can learn new commands, although the process might take a bit longer. Adjust your **training** methods to suit your **dog's** age and abilities.

5. How do I handle different personalities? My **dog** is stubborn; my friend's **dog** is timid. Tailor your approach to your **dog's** personality. Use positive reinforcement consistently, but adjust the method to suit the individual. For stubborn dogs, focus on making the **training** highly rewarding; for timid dogs, use gentle encouragement and avoid pressure.
